Story 1:

[Tip: Mark the initial camera position.] Your favorite teacher, Ms. Ancient is in her classroom facing her desk. As we enter, she turns to us and says, “Good morning! Today we’re going to practice our multiplication table.”

[Interactive part of the story] Ms. Ancient picks two numbers, each of them between 1 and 12, and asks us what we get if we multiply them together. If we answer correctly, she jumps for joy. If we answer incorrectly, she shakes her head.

[Modify the story in the following ways: (1) Ms. Ancient will pick two different numbers every time we run the world, (2) Ms. Ancient will keep asking us until we get the correct answer, and (3) once we get the correct answer, Ms. Ancient will come up with another problem for us.]
